» HELLO

I'm a programmer and a designer. There is a great rift in this industry between those two groups. This rift does not exist for me. My passion for creating beautiful, fully interactive work extends through both sides. I have a strong belief that any boundaries we have are self-imposed. There is satisfaction to be found in both of these equally-important roles, and I plan on conquering them both.

» EXPERIENCE

2012 - Present
Software Engineer
SweetRush | San Francisco, CA | Misha Milshstein

• Experience developing mobile applications for multiple different devices.

• Experience working on single page JavaScript applications and components.

• Experience working with Unity3D and implementing UI front end.

2000 - Present
Software Engineer & Design Technologist
Freelance Contractor

• Developed video streaming applications and streaming server configuration.

• Led the development of a 3D third person adventure game for Taco Maker®, distributed to all their restaurant chains in Puerto Rico.

• Developed mobile app with real-time GPS tracking, server-side connections and peer-to-peer chat functionality.
